"Engineering with Integrity in the Digital Age"

OBJECTIVE

- ✓ **Strengthen integrity and professionalism in engineering practice** in response to emerging challenges in the digital age, including AI, cybersecurity and ethical accountability.

- ✓ **Equip registered Persons and Engineering Consultancy Practices with critical regulatory insights and practical knowledge** to navigate evolving standards, compliance requirements and professional expectations.

- ✓ **Provide a forward-looking platform on the future of engineering** addressing digital transformation, innovation and the evolving role of engineers in a technology-driven environment.

- ✓ **Enhance professional competence and industry relevance** through focused discussions on real-world challenges in practice, contracting, safety and workforce development.

- ✓ **Connect engineers across industry, academia and future talent pipelines** fostering collaboration, knowledge exchange and the development of the next generation of engineering professionals.
